Matt, Thank you for all your legwork on this. Can you give Cally Younger (BLM) and Joshua Hanson (SOL) access to the share drive you set up. I will give you a call today. Ed

Hello Ed,  
Attached is a updated "Objects & Research Highlights" putting more meat on the Flora/Fauna.

I wanted to let you know that Sally Butts (NLCS) also called with a request for materials -- hard copies of the Management Plan, Science Symposiums, dinosaur books and the like. We will Fed Ex these materials in tomorrow's mail. I let her know that UTSO was also responding to a request.

Let me know if you need anything else.

Ed,  
Attached is a summary of some of the new research related to GSENM Objects since designation.

Also, I feel we can offer a little more information about the landscape feature data that is being used on the maps. I can work with Brian on it if you like.

I hope you find the information useful and please let me know if you need anything else.

**Subject:** Fwd: GSENM Requested Maps

Here are maps with some of the individual data layers you were looking for. The first is Wilderness Study Areas. The second is Lands with Wilderness Character. There is still some project related LWC inventory work being done in the southwest portion of the monument so it will change. The last two maps show oil and gas and coal leases at the time the monument was established. We are will get mineral potential information tomorrow. The last map shows polygons depicting the landscape features/objects listed in the proclamation. Here are the objects/features.

(b) (5) DPP

When we get the mineral info we can produce a map with all four layers you requested. ed
